"The registers of crippled children in the 48 States, Alaska, the District of Columbia, Hawaii, and Puerto Rico on June 30, 1944, included the names of 373,177 crippled children. ... 97% of the children so registered were suffering from orthopedic or plastic conditions. ... Among the major causes of crippling, as shown by State registers, are infantile paralysis, congenital defects, birth injuries, accidents, rickets, osteomyelitis, and bone and joint tuberculosis."

The amount of Federal funds paid to the States for services for crippled children has increased from \$732,492.33 in the 1936 fiscal year to \$3,781,751.77 in the 1944 fiscal year. Children under care in 1944 included 31,428 in hospitals, 5,660 in convalescent homes, and 1,190 in foster homes [these figures include readmissions]. The pamphlet includes a directory of state agencies administering services for crippled children.
